- Arabic
- English

Ahmed Osama

Frontend Developer

Beginner Frontend Developer, passionate about improving my web development skills. I love transforming ideas into captivating user experiences and continuously seek to learn the latest technologies and tools in this field.

Projects

- ### Holy Quran website
  - **Description**: A 4-page website offers users audio of 46 sheikhs reciting the entire Qur'an (P-1), interactive Qur'an text (P-2), an audio broadcast with 23 sheikhs (P-3), and live videos from the Makkah Al-Mukarramah TV channel (P-4).
  - **Skills used**: html, CSS, JS, Bootstrap
  - **Challenges and solutions:** I faced challenges in integrating different multimedia sources. These challenges were solved by studying the documentation for the APIs used and improving the bindings between them.

- ### React Dashboard
  - **Description**: A 4-page website includes a dashboard displaying customer information with graphs (P-1), a calendar for task and appointment management (P-2), a world map highlighting countries (P-3), and a table presenting customer data (P-4).
  - **Skills used**: JSX, CSS, ReactJS, (Echarts, FullCalendar, Nivo.Rooks, MUI)
  - **Challenges and solutions:** I faced challenges in making the site responsive to all screens without compromising the design, and dealing with libraries, understanding them, and formatting them to suit the design.

- ### React Game
  - **Description**: The website includes the Who Wants to be a Millionaire game
  - **Skills used**: JSX, CSS, ReactJS
  - **Challenges and solutions:** Using hooks to bring the project idea to life, making the page interactive without the need for reloading.
